Bentoniet High Yield Zak 25 KG  
Batch 213123  
Productie datum: 09.03.22  
Zak 25 KG  
Batch 213123

## Product data sheet

Bentonite HY - HY is a modified bentonite

### APPLICATION

HDD Bentonite – HY is a dedicated drilling additive for projects where mud recycling is not considered so mainly for smaller rigs and projects. Less product is needed compared with basic bentonite to achieve similar rheological properties and drilling performance.

### DOSAGE

25 – 30 kg/m<sup>3</sup>

### RHEOLOGY

Plastic viscosity	14-16	CP
Yield Point	24 - 27	lb/100ft <sup>2</sup>
Marsh funnel	60 – 65	Sec
Fluid loss	<15	ml/30 min

### PACKAGING

- 1000 kg Big Bag
- 25 kg bags

Revision date: 12-09-2019. The above concentrations and resulting rheological values are indicative, conditions may vary and the information given is to be used as a guideline only.
